PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on experience building and evaluating machine learning models end-to-end — from data collection and preprocessing through model tuning, evaluation, and interpretability. Comfortable working in Python with libraries such as Scikit-learn, XGBoost, and Pandas, with a solid grasp of core AI/ML fundamentals and strong interest in deepening exposure to deep learning and NLP. Strong analytical and research skills, a clear technical communicator, and eager to learn how AI/ML projects move from research to real-world deployment alongside senior engineers.

EDUCATION

BSc in Computer Science and Engineering

2022 – 2026

Daffodil International University, Dhaka

CGPA: 3.77 / 4.00

PROJECTS

Crop Yield Prediction System | *Python · XGBoost · Scikit-learn · Pandas · SHAP · Flask*

- Built a full ML pipeline on 5,608 records — data cleaning, preprocessing, feature handling, and training across 8 model variants — tuning the best model (XGBoost) to $R^2 = 0.836$.
- Applied SHAP for model interpretability and deployed a Flask web app for real-time inference, gaining practical exposure to taking a model from research to a usable interface.
- [GitHub](#)

Credit Default Prediction System | *Python · XGBoost · StandardScaler · Streamlit*

- Built a binary classification model to predict customer credit default risk, with feature scaling and preprocessing on structured financial data.
- Developed full and fast prediction modes to balance accuracy vs. speed, and deployed a Streamlit interface for real-time risk classification with confidence scores.
- [GitHub](#)

Hand Gesture Controlled Wheelchair | *Arduino · nRF24L01 RF · MPU6050 · Embedded C*

- Built a wireless assistive-mobility prototype that collects and processes live motion-sensor data (MPU6050) to translate hand gestures into directional commands, transmitted between two Arduinos over 2.4GHz RF.
- [GitHub](#)

TECHNICAL SKILLS

AI/ML: Machine Learning Fundamentals, Model Training & Evaluation, Feature Engineering, Model Interpretability (SHAP)

Languages: Python, C, Java, Dart

ML & Data Tools: Scikit-learn, XGBoost, Pandas, NumPy, Streamlit

Data Handling: Data Collection, Cleaning & Preprocessing, Exploratory Data Analysis, MySQL

Tools & VCS: Git, GitHub, VS Code

Other: Technical Documentation, Research, Data Structures & Algorithms, OOP

Soft Skills: Analytical Thinking, Research & Communication, Collaboration, Time Management

LANGUAGES

Bengali (Native) English (Fluent)
